INSTRUCTIONS

- This test consists of a series of passages, each of which is followed by several statements.
- Your task is to evaluate each statement, based on the information given in the passage, and to mark the appropriate space on the answer sheet, following the rules given below.
- Now we will work through the examples given below, to ensure you know how the test works.
- Mark your answers in the section below.

EXAMPLE

The slogan, "leadership through quality", has been adopted for our current public Relations campaign in an attempt to upgrade our image. This reflects the emphasis this company has always placed on quality. The campaign aims to express outwardly our interpretation of quality as technical excellence, breadth of product range, customer service and value for money. We are convinced that the investment involved will result in increased profits

Mark A if the statement is TRUE or follows logically

Mark B if the statement is FALSE or the opposite follows logically

Mark C if you CANNOT SAY whether the statement is true or untrue

- 1. Quality is being defined in terms of four concepts.
- The company has previously paid little attention to public relations.
- Investment in public relations is not expected to produce a financial return.
- The quality slogan is being used as an imagebuilding device.

Question Number	A	В	С
1	X		
2			X
3		Х	
4	X		

REMEMBER

- The test consists of 40 questions and you have 20 minutes in which to answer them.
- · You will need to work quickly and accurately
- Fill in completely the appropriate square or circle on the answer sheet.
- Do not make any marks on this test book
- Always make sure that the number of the question corresponds with the number on the answer sheet
- Fully erase any answer you wish to change

DO NOT TURN THE PAGE UNTIL YOU ARE TOLD TO DO SO

Confederation and Friendly Trust published a rather self-conscious statement yesterday morning, to inform shareholders of 'an approach' which could possibly lead a bid for the company. It now transpires that the approach was made by Executive Life Group whose subsidiary, Crown and Colonial Insurance, already has a substantial holding in Confederation and Friendly. The exact nature of the approach has still not been made clear.

Mark A if the statement is TRUE or follows logically

Mark B if the statement is FALSE or the opposite follows logically

Mark C if you CANNOT SAY whether the statement is true or untrue

- Executive Life Group has an indirect holding in Confederation and Friendly Trust.
- 2. Crown and Colonial Insurance has no involvement in Confederation and Friendly Trust
- 3. A Confederation and Friendly are showing a degree of caution in releasing information about the potential bid.
- 4. Confederation and Friendly Trust wish to contest any bid to control over them.

Parts can only be drawn on the basis of properly completed dockets, which are issued by the Engineering Department. For jobs which are currently in progress, any request for materials or spares will be prioritized in accordance with the urgency of the order, as determined by the Chief Engineer's office. Only in the case of emergency call-out where spares or materials are needed immediately will these be made available without such explicit authorization.

Mark A if the statement is TRUE or follows logically

Mark B if the statement is FALSE or the opposite follows logically

Mark C if you CANNOT SAY whether the statement is true or untrue

- 5. The procedure for indenting for parts has become more rigorous.
- 6. The issue of spares for emergency repairs has no priority over parts planned for project work.
- The issue of parts is normally subject to an assessment of urgency.
- 8. Materials cannot be issued from the store without the express approval of the Chief Engineer.

Infocorp was originally set up as a joint venture between the Business Office Bureau and Cash Machines Limited. The latter contributed both technical and marketing know-how for 50% of the equity, whilst the government agency, which controls the rest of the ownership, provided 90% of the necessary initial funding. Hitherto, government departments and local authorities have provided the main client base. Whilst continued marketing effort will be put into this area, the organisation's current 'mission statement' refers primarily to the area of small businesses, which is also of particular interest to the Business Office Bureau

Mark A if the statement is TRUE or follows logically

Mark B if the statement is FALSE or the opposite follows logically

Mark C if you CANNOT SAY whether the statement is true or untrue

- 9. C The majority of Infocorp's initial funding came from the private sector.
- 10. A Infocorp is seeking to change its client mix.
- 11. A Cash Machines Limited's holding in Infocorp was justified more by their expertise than by financial input.
- 12. A change in the ownership structure of Infocorp is imminent.

A recent survey showed that employees of the Inland Revenue were three times as likely as other members of the national workforce to suffer from anxiety or depressive illness. So one can only welcome the new guidelines to them, which encourage a more informal, helpful and co-operative approach to their work, both with individuals and corporate entities. The image of the tax inspector or collector has been rather negative, from biblical times onwards, and they can even be the butt of much humour, as well as being blamed for the misfortunes of many small business people who cannot keep their books straight. Law enforcement agencies always have a narrow tightrope to tread, but some manage better than others.

Mark A if the statement is TRUE or follows logically

Mark B if the statement is FALSE or the opposite follows logically

Mark C if you CANNOT SAY whether the statement is true or untrue

- 13. B It is only since the Industrial; revolution that tax collectors have acquired a negative image.
- 14. Depression and anxiety are less prevalent among tax officials than in the rest of the economy.
- 15. One in three employees of the revenue service suffers from anxiety or depression.
- 16. Revenue staff should aim to carry out their enforcement role in a generally helpful manner.

Until the 1970's the design and manufacture method of bicycles had remained virtually static for many years. However, in recent years the market has grown with increased demand from children, business people and keep fit enthusiasts. The trend has been to produce more racing bicycles with multiple gears, folding bicycles and exercise bicycles. The variety of models has increased enormously, though their durability and reliability has not improved.

Mark A if the statement is TRUE or follows logically

Mark B if the statement is FALSE or the opposite follows logically

Mark C if you CANNOT SAY whether the statement is true or untrue

- 17. There has been an increase in sales of bicycles to keep fit enthusiasts.
- 18. C The demand for folding bicycles comes mainly from business people and keep fit enthusiasts.
- 19. Since the 1970's the range of bicycles produced has lacked diversity.
- 20. Folding bicycles are a recent innovation.

By the middle of the next decade a sharp fall in the availability of graduates has been predicted, which is in contrast to the present upwards trend towards a peak in three years time. Competition for graduates, which is already intense, is likely to increase over the next decade, as demand exceeds supply. Employers need to be increasingly proactive in their planning for coping with the anticipated shortage,

Mark A if the statement is TRUE or follows logically

Mark B if the statement is FALSE or the opposite follows logically

Mark C if you CANNOT SAY whether the statement is true or untrue

- 21. A There will be an increase in the number of graduates available for employment next year.
- 22. C Despite declining numbers of graduates in the next decade supply will still exceed demand.
- 23.
 By the middle of the next decade, graduates should have improved prospects of gaining employment, compared with current graduates.
- 24. Current and future trends in graduate employment are the subject of much research.

Ocean-going vessels need charts of the sea bed, often more than a thousand for a single voyage; frequent changes of knowledge about the sea bed entail many hours of work altering the charts by hand. A new electronic system would be able to store and automatically update all the information presently contained in charts and display this on a screen. Such charts are invaluable to fishermen in locating fish and in helping them to avoid fouling their nets.

Mark A if the statement is TRUE or follows logically

Mark B if the statement is FALSE or the opposite follows logically

Mark C if you CANNOT SAY whether the statement is true or untrue

- 25. The proposed electronic system would not be an alternative to conventional charts of the sea bed.
- 26. The proposed system would be more valuable to the fishing industry than to other mariners.
- 27. A The new electronic system would make the updating of information a less labour intensive operation.
- 28. The shape of the ocean floor is constantly changing.

During the last six months vehicles covering the North and West regions have consistently managed to exceed their targets for delivery within three days from receipt of order. They have also been able to cope with 90% of all 'specials'; that is, emergency orders for immediate delivery at premium rates. The South and East regions, on the other hand, are still performing below target. A number of reasons have been put forward for this difference in performance: greater traffic congestion, higher labour turnover of drivers and more variability in customer ordering patterns in the South and East; and a fall off in volume of business in the North and West, compared with the same period last year.

Mark A if the statement is TRUE or follows logically

Mark B if the statement is FALSE or the opposite follows logically

Mark C if you CANNOT SAY whether the statement is true or untrue

- 29. Customers have to pay extra for an immediate delivery service.
- 30. P 'Special' orders are on the increase in the South and East.
- 31. The delivery service in the North and West is no more cost effective than that in the South and East regions.
- More goods have been sold in the North and West regions in the past 6 months, than in the same period last year.

Palmer's survey posed a number of questions relating to the introduction of new technology, a key issue for most firms in this industry over the past decades. The survey report suggests that this may become an increasingly important topic in management-union discussions. Hitherto, bargaining has mainly concerned pay and manning, with subjects such as health and safety being negotiated in about half the cases quoted. It was only in a small minority of cases covered by the survey that capital investment policy or choice of technology were formally raised as bargaining issues.

Mark A if the statement is TRUE or follows logically

Mark B if the statement is FALSE or the opposite follows logically

Mark C if you CANNOT SAY whether the statement is true or untrue 33. According to Palmer's survey, health and safety is less frequently a bargaining subject than is technology.

Based on issues raised in bargaining, the evidence for union interest in technology is still far from overwhelming.

35. The survey suggests that the effect of technology changes on employee relations is largely a matter of past history.

36. Unions are becoming less concerned with pay as a bargaining issue.

Under new regulations, airlines need only publish proposed changes to fares 10 days in advance and these will be implemented automatically unless the Aviation Authority finds them unfair. It is not expected that a price war will result and the encouragement of new market opportunities is welcomed, as well as a speeding up in the process of launching new fare scales.

Mark A if the statement is TRUE or follows logically

Mark B if the statement is FALSE or the opposite follows logically

Mark C if you CANNOT SAY whether the statement is true or untrue 37. C All fares are currently unreasonably high.

38. Under previous regulations, it took longer than 10 days to bring new passenger tariffs into effect.

39. The new regulations may enable airlines to attract new business.

40. Even though the Aviation Authority accepts a new fare scale, an airline must wait 10 days before publishing the change.

INSTRUCTIONS

- In this test you will use facts and figures presented on the data sheet to answer questions.
- In each question you are given up to 5 possible answers, only one is correct.
- Do not write anything in this test paper, you will be given scratch paper to do your rough work on.
- Identify the correct answer and mark it on your answer sheet.
- We will work through the examples to ensure you understand the test.

EXAMPLES

1 What was Daramola's lowest mileage week?

A	Week 1	В	Week 2	C	Week 3	D	Week 4	E	Week 5

2. How many tonnes of Ground Nuts were produced by Okori Farms in 1997?

A	5	D	1.0	0	25	D	10	T	15	
A	3	B	10		33		40	E	43	

3. What was the coffee price index mid way through 1995?

A 100	В	103	C	106	D	124	E	Cannot say
-------	---	-----	---	-----	---	-----	---	------------

ANSWERS

Question Number	Α	В	С	D	E
1			X		
2			X		
3					X

REMEMBER

- This test consists of 35 questions and you have 35 minutes to answer them
- Fill in the appropriate answer on the answer sheet
- Always make sure that the number of the question corresponds to the number on the answer sheet
- Do not make any marks on this test booklet
- Do your calculations on the paper provided
- Fully erase any answer you wish to change

ABSTRACT REASONING

ACR 04-1

Duration: 20 min

Last updated Feb 2006

THIS BOOK CONTAINS 6 PAGES

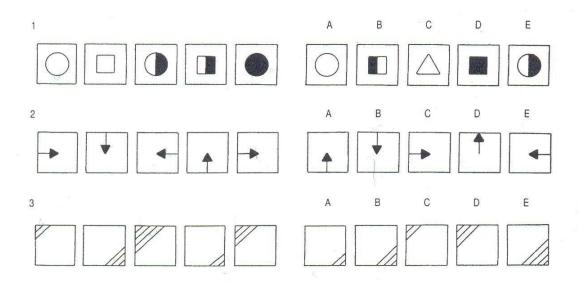

ABSTRACT CRITICAL REASONING (ACR 04-2)

INSTRUCTIONS

Each problem in this test consists of a series of diagrams, on the left of the page, which follow a logical sequence. You are to choose the next diagram in the series from the five options on the right and then indicate your answer by filling in the appropriate space on you answer sheet.

Now we will work through the examples given below, to ensure you know how the test works. Mark your answers in the section below.

EXAMPLES

Place your answers in this section

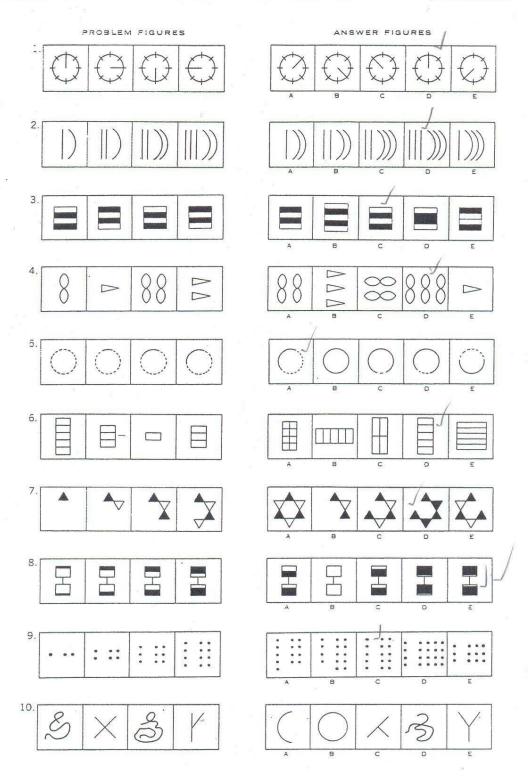

Question Number	A	В	С	D	E
1					
2					
3					

REMEMBER

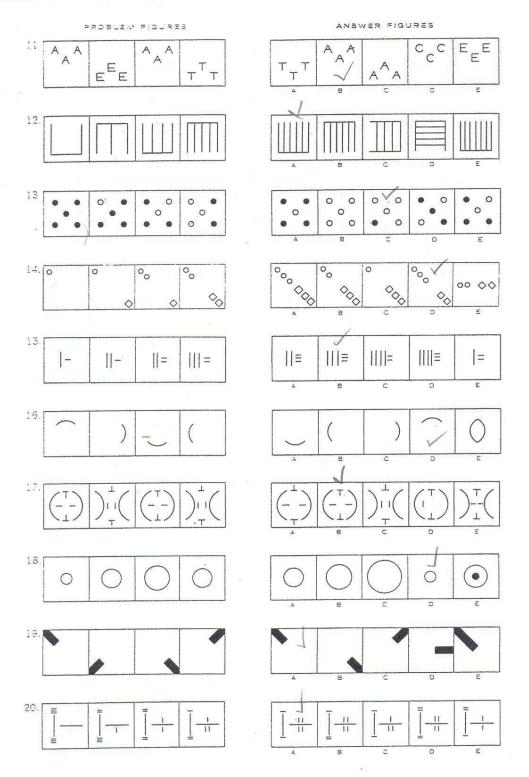

- The test consists of 40 questions and you have 20 minutes in which to answer them.
- You will need to work quickly and accurately
- Fill in completely the appropriate square or circle on the answer sheet.
- Do not make any marks on this test book
- Always make sure that the number of the question corresponds with the number on the answer sheet
- Fully erase any answer you wish to change

DO NOT TURN THE PAGE UNTIL YOU ARE TOLD TO DO SO
