Calculator

- 4) To entice customers away from competitors, Konga supermarkets have begun offering discounts on home appliances to customers who spend ₦50 or more on any shopping trip to Konga. Konga executives claim that the discount program has been a huge success, since cash register receipts of ₦50 or more are up thirty percent since the beginning of the programme. Which of the following, if true, most seriously weakens the claim of the company's executives?
- A) ☐ Most people who switched to Konga after the programme began to spend more than ₦50 each time they shop at Konga.
 - B) ☐ Most people whose average grocery bill is less than ₦50 would not be persuaded to spend more by any discount programme.
 - C) ☐ Most people who received discounts on home appliances through Konga programme will shop at Konga after the programme ends.
 - D) ☐ Almost all of the people who have begun spending ₦50 or more at Konga since the discount programme began are longtime customers who have increased the average amount of their shopping bills by making fewer trips.

Calculator

- 5) Statement of a South African copper mining company's import quotas should be imposed on the less expensive copper mined outside the country to maintain the price of copper in the country; otherwise, South African companies will not be able to stay in business. Response of a South African copper and wire manufacturer: South African wire and cable purchased about 70 percent of the copper mined in the United States. If the copper prices we pay are not at the international level, our sales will drop, and then the demand for South African copper will go down. If the factual information presented by both companies is accurate, the best assessment of the logical relationship between the two arguments is that the wire manufacturer's argument is self-serving and irrelevant to the proposal of the mining company
- A) ☐
 - B) ☐ Is circular, presupposing what it seeks to prove about the proposal of the mining company.
 - C) ☐ shows that the proposal of the mining company would have a negative effect on the mining company's own business.
 - D) ☐ Fails to give a reason why the proposal of the mining company should not be put into effect to alleviate the concern of the mining company for staying in business

Blood banks will shortly start to screen all donors for NANB hepatitis. Although the new screening tests are estimated to disqualify up to 5 percent of all prospective blood donors, they will still miss Two-thirds of donors carrying NANB hepatitis. Therefore, about 10 percent of actual donors will still supply NANB-contaminated blood. The argument above depends on which of the following assumptions?

- A) ☒ Donors carrying NANB hepatitis do not, in a large percentage of cases, carry other infections for which reliable screening tests are routinely performed.
- B) ☐ Donors carrying NANB hepatitis do not, in a large percentage of cases, develop the disease themselves at any point.
- C) ☐ The estimate of the number of donors who would be disqualified by tests for NANB hepatitis is an underestimate.
- D) ☐ The incidence of NANB hepatitis is lower among the potential blood donors than it is in the population at large.
